

## **The Medical Centre for Animals, Amsterdam, The Netherlands, has an opening for a veterinary physiotherapist or rehabilitation therapist.**

Are you enterprising, enthusiastic and do you enjoy working with veterinarians and veterinary technicians? Welcome to our Orthopedics team!

### **Who are we?**

The Medical Center for Animals, Department of Orthopedics, is part of the largest specialist clinic in the Netherlands for companion animals. The orthopedics department takes care of the treatment of all orthopedic patients and is an independent company in this collaboration. At this department we work with 4 veterinary surgeons specialists, 2 ECVS residents, 2 veterinarians, 19 veterinary technicians, 2 veterinary rehabilitation/physiotherapists and 4 back office employees.

### **Veterinary rehabilitation/ physiotherapy at MCD**

At the physiotherapy department you see a lot of different patients. For example:

- Patients that need rehabilitation after surgery such as, hernia, patellar luxation, TPLO.
- Treatment of osteoarthritis patients
- Patients with tendon injury
- Treatment of orthopedic problems like hip dysplasia

### **Who are we looking for?**

An veterinary physiotherapist or rehabilitation therapist who:

- Becomes enthusiastic about new developments around physiotherapy for animals and is happy to contribute ideas
- Likes to work with both veterinarians and veterinary technicians and contributes to a good working atmosphere
- Is accurate and has the quality of his/her work of paramount importance
- Is communicative
- And, last but not least, someone who is very customer-friendly
- Has a degree in veterinary physiotherapy or rehabilitation

### **What do you get in return?**

- A challenging job with a lot of depth in your profession
- A professional working environment in a specialist clinic where both doctors and veterinarians advise and support you in your work
- Plenty of room for your own input with regard to the introduction of new treatment techniques
- Plenty of services and facilities such as a underwater treadmill , laser therapy , TENS and a lot of materials, to do different exercises, are available.
- Working in a motivated team with an informal working atmosphere
